555 4th Street, NW

Washington, DC 20530

Re: *Request pursuant to 18 U.S.C. §3332 to inform the grand jury of whether President Barack Obama may have violated Federal criminal law, my identity and your action or recommendation*

Greetings,

I write to request pursuant to 18 U.S.C. §3332 that you inform the grand jury of the following alleged offense committed by President Barack Obama, my identity, and your action or recommendation. Moreover, pursuant to 18 U.S.C. §1504, I request that you communicate to the Grand Jury my request to appear before the Grand Jury.

I allege that President Obama may have violated a Federal criminal law, to wit, 18 U.S.C. §1343, "Fraud by wire, radio, or television". That statute makes it a Federal felony offense to: "having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses, representations, or promises, transmits or causes to be transmitted by means of wire, radio, or television communication in interstate or foreign commerce, any writings, signs, signals, pictures, or sounds for the purpose of executing such scheme or artifice."

The particular event which I believe may constitute criminal behavior is the posting on the Internet at [whitehouse.gov](http://whitehouse.gov) of the President's putative "Certificate of Live Birth" ("COLB") on April 27, 2011. Initially, it is well-settled that the "use of the Internet for transmission of images or messages satisfies the requirement of interstate commerce." *See, e.g., United States v. Carroll*, 105 F.3d 740, 742 (1st Cir. 1997). Moreover, to seek to obtain public money – here the salary of the President of the United States – has been recognized as satisfying the "money" element of §1343. *See, e.g., Pasquantino v. United States*, 544 U.S. 349, 356-57 (2005) (recognizing that money in the public treasury is the government's "money" for purposes of the mail fraud statute.) Finally, the "scheme" that President Obama appears to have intended is to obtain a job that he is not eligible to hold given his lack of "natural born Citizen" status. *See, e.g., United States v. Granberry*, 908 F.2d

Ronald C. Machen Jr.  
United States Attorney for the District of Columbia  
January 31, 2012  
Page 2

278, 279 (8<sup>th</sup> Cir. 1990)(The defendant obtained the job of school-bus driver by concealing a murder conviction, which would have prevented his hiring if known to the school district. The Eighth Circuit reversed the district court's dismissal of the mail-fraud indictment, holding that the defendant's alleged scheme deprived the school district of money because the district did not get what it paid for – a school-bus driver who had not been convicted of a felony.)

Of course, the seminal question devolves down to this: Is President Obama ineligible to hold the office of President and did he knowingly foist upon the public a falsified Certificate of Live Birth in order to obtain that office.

Indisputably, in order to be President of the United States, Article II, §1, of the U.S. Constitution requires: “No person except a natural born Citizen . . . , shall be eligible to the Office of President.” The phrase “natural born Citizen” is an 18<sup>th</sup> Century legal term of art with a definite meaning. At the time of the adoption of the Constitution, that phrase was defined as: “The natives, or natural-born citizens, are those born in the country, of parents who are citizens.” (The Law of Nations, Emerich de Vattel, 1758, Chapter 19, § 212).

Clearly, Barack Obama has represented that he is the son of a non-citizen of the United States, Barack Hussein Obama, Sr., who was a citizen of Kenya. Accordingly, upon the law and facts, Barack Obama is not a “natural born Citizen” and thus is ineligible to hold the office of President of the United States.

Returning to the release by Mr. Obama of his putative “Certificate of Live Birth” on April 27, 2011, there is probable cause to believe that the certificate is a forgery. A copy of that COLB is attached as Exhibit “A”. Reviews of that document raise very real concerns as to its authenticity. In particular:

1. The Hawaiian State seal on the COLB is the wrong size. (Vogt Analysis, Exhibit “B”, page. 3, pages 11-13).
2. The hand-stamped State Seal on the two “certified” copies of the COLB are in exactly the same location, an improbable event. (Vogt Analysis, page 3).
3. The COLB has two different type of scans contained in it, binary and grayscale, an impossibility in one scanned object. (Vogt Analysis, page 5).
4. The parallax of the type reveals that there has been tampering. For example, on the COLB: “the work *Name* drops down 2 pixels, but the typed hospital name, *Kapiolani*, does not drop down at all, and again the line just below drops down 2 pixels, but not the name *Kapiolani*.” (Vogt Analysis, page 6).

5. There is white “haloing” around all the type on the form, an indication of tampering with the image. (Vogt Analysis, page 7).
6. The typewritten letters were “cut” and “pasted” into place. (Vogt Analysis, page 9).
7. The “Bates Stamped” sequential number is out of sequence. (Vogt Analysis, page 10).
8. There are two different colors in Box 20 and Box 22, an impossibility on an originally scanned document. (Vogt Analysis, page 10).
9. The Rubber Stamp contains an “X” rather than an “H” in the word “the” when other contemporaneous COLBs with the same stamp do not contain the “X”. (Vogt Analysis, page 13).
10. There are nine “layers” to the Adobe Portable Document File COLB, an indication of a forgery. (Vogt Analysis, pages 16-17).
11. The typewritten letters change size and shape, an impossibility on 1961 typewriters. (Irey Analysis, Exhibit “C”).
12. An affidavit from Timothy Adams, an employee of the Honolulu Elections Division that there is no “Hawaii long-form, hospital-generated birth certificate” for Barack Obama. (Adams Affidavit, Exhibit “D”).

Finally, it is noteworthy that at the Press Conference on April 27, 2011, President Obama reportedly made the following statement regarding his Certificate of Live Birth: “As many of you have been briefed, we provided additional information today about the site of my birth. Now, this issue has been going on for two, two and a half years now. I think it started during the campaign. And I have to say that over the last two and a half years I have watched with bemusement, I’ve been puzzled at the degree to which this thing just kept on going. We’ve had every official in Hawaii, Democrat and Republican, every news outlet that has investigated this, confirm that, yes, in fact, I was born in Hawaii, August 4, 1961, in Kapiolani Hospital. We’ve posted the certification that is given by the state of Hawaii on the Internet for everybody to see.”<sup>1</sup>

Accordingly, President Obama clearly was involved in posting his Certificate of Live Birth on the Internet towards the end of representing that he was born in Hawaii when it now appears that the Certificate of Live Birth is a forgery.

## **News Release of June 13, 2011**

### **Final Analysis of President Obama's Certificate of Live Birth**

By Douglas Vogt

Re: Legal proof that President Obama's Certificate of Live Birth is a forgery.

Dear Sir/Madam,

I have irrefutably proven that the Certificate of Live Birth that President Obama presented to the world on April 27, 2011 is a fraudulently created document put together using the Adobe Photoshop or Illustrator or other graphic programs on a Mac OS computer and the creation of this forgery of a public document constitutes a class B felony in Hawaii and multiple violations under U.S. Code Title 18, Part 1, Chapter 47, Sec.1028, and therefore an impeachable offense. When this comes to the public's attention, it will be the greatest scandal in the country's history—nothing comes even close. This will surpass all previous scandals including the Watergate scandal of the Nixon administration.

#### **My Credentials**

I have a unique background that enables me to analyze this document in a competent, detailed, and extensive manner. I owned a typesetting company (Nova Typesetting) for eleven years, and thus have extensive knowledge and experience in type and form design. I have owned Archive Index Systems since 1993, a company that sells a wide selection of document scanners worldwide, and which also developed and sold document imaging software (TheRepository). Additionally, I have an extensive knowledge of how scanners function and their capabilities. I have also sold other document imaging programs, such as Laser Fiche, Liberty and Alchemy. I have sold and installed document imaging systems in city and county governments, and thus have extensive knowledge of municipal and county document imaging programs and procedures, including the design and implementation of such programs. Additionally, I have a good working knowledge of Adobe Photoshop and Illustrator. These factors will be crucial in understanding what has occurred with Obama's Certificate of Live Birth.

#### **What President Obama Presented to the Public is an alleged Certificate of Live Birth.**

What President Obama presented is not the hospital birth certificate. In most states the hospital birth certificate would have the imprint of the baby's footprint, weight, length and other information. Most hospitals take a footprint of the baby before the baby even leaves the birthing room. This is done to establish positive identification. In my state of Washington, the religion of the parents is even identified on the hospital birth certificate. The birth certificate would be the source of the same information that would be typed onto the Certificate of Live Birth (the Long Form, COLB). What President Obama released was supposedly a copy of the Long Form that the county gets from the hospital, which is typed on a blank form and given to the hospitals by the county. That copy is then mailed to the county Board of Health and kept as a legal government document. On Obama's form (see Figure 1) the County Clerk supposedly hand stamped the form on the upper right hand corner

with a Bates number stamp. The number is a sequential number that reflects the sequence of Certificates that come into the County Health Department on a daily basis. The number was most likely stamped by hand because the number is crooked. The County Clerk also hand stamps the date of acceptance in boxes 20 and 22. Obama's Long Form was supposedly received on August 8, 1961, four days after his birth. The County Clerk would then sign the certificate (box 21) with his or her complete legal name, no initials.

 Director of Health DATE **5-5-1966** REGISTRAR GENERAL

Figure 2. The microfilmed Certificate of Live Birth of Susan Nordyke dated August 11, 1961.

There are four important things wrong with the White House story of how they acquired the Certificate of Live Birth from the Department of Health on April 25, 2011 and with the document they presented to the country on April 27, 2011. There was a prepress conference at 8:48 a.m. about an hour before President Obama gave his news conference. The 8:48 a.m. press conference was given by Mr. Carney the Press Secretary, Mr. Dan Pfeiffer the Director of Communications and Mr. Robert Bauer the President's White House Counsel (now resigned). In that press conference Mr. Bauer gave the impression that it was a difficult process to get the President a Long Form Certificate of Live Birth but when I examined the Hawaii law (Appendix B) §338-13 states "the department of health **shall** [my emphasis], upon request, furnish to any applicant a certified copy of any certificate, or the contents of any certificate, or any part thereof." Further §338-18 Disclosure of records section list a great number of parties who would have a right to get such a form including: "The registrant," "A person or agency acting on behalf of the registrant"; and "A governmental agency or organization who for a legitimate government purpose maintains and needs to update official lists of persons in the ordinary course of the agency's or organization's activities." The three I have listed here the White House Attorney could have easily used to demand a certified copy of the Long Form Certificate of Live Birth. There were over twenty different types of individuals or agencies who could have legally requested these certificates with little difficulty.

The second major problem is Mr. Pfeiffer's admission that they had received two stamped and sealed copies of the COLB from Hawaii. This was revealed when a reporter asked Mr. Pfeiffer:

"Q You've got two certified copies, according to this study. You have these physical --  
 MR. PFEIFFER: Yes. I showed you one. Just one.

Q You showed us a photocopy of one.

MR. PFEIFFER: No, I showed you --

Q Does that have a stamp?

MR. PFEIFFER: It has a seal on it.”

The White House Press Corps had received a packet with a black and white copy of the COLB but it did not display any security paper design in the background. The only place it faintly showed up was in the grayscale side bar on the left where the page curved down. The question is: Why did the White House reproduce a grayscale copy with no background green color? The answer will become obvious later but first I needed to discover how they did it. There are two ways to drop out a color. One way is to just use a dropout filter on your color scanner and green is one of the colors that can be dropped out. The second way is to first export the image out of the PDF file as a tiff or jpg format then to bring it into Photoshop or Illustrator and adjust the color balance, the brightness and contrast. Next I had to select all the type and line elements in the picture and copy that but not copy the background remnant color. The next step was to open a new document file and import it into the new page as a grayscale image. I did final adjustments to the background and contrast and the end result is the same as what the White House gave the Press Corp. The question is: Why did they go to such trouble to do this? Now comes the next part of the mystery.

Earlier that morning Savannah Guthrie, a reporter from MSNBC and their legal adviser, stated “I saw the certified copy of long-form POTUS birth certificate today, **felt the raised seal** [my emphasis], snapped this pic[ture]. And here is the wider shot I took of the birth certificate.” Her photo (see Figure A) of the document showed the left and right hand sides of the document so I knew that was 8.5” wide. This security paper is commercially available and is called Green 8½x11; 24 lb. basketweave security paper. I was then able to determine the scale of all the components on the form. I have gone into greater detail in #6 below but the end result is that the seal she saw and supposedly felt was only 1¾” in diameter. The legal seal (See #6 for the Hawaii statute) is supposed to be 2¼” in diameter and hence not a legal seal. There was a surprise in this discovery. The current Department of Health seal is not the same one they had in the 1960s. That one was 2¼” in diameter (see Figure 18) but the Obama COLB seal is not legal—it’s the wrong size! The Obama seal, besides the size problem, is not legible. You cannot make out any of the words, the stars or the Caduceus therefore we do not know if it’s even the Department’s seal. Savannah Guthrie was used by the administration to verify a document that was fraudulently created.

This is why I think the administration created a grayscale image of the COLB for the Press Corps people and also had Savannah Guthrie see a color picture with a seal embossing on it. The White house knew they had a problem with the seal being too faint and the wrong size so they made it impossible for the news people to see any evidence of a seal but they chose a lawyer from a very sympathetic news agency, MSNBC to verify a seal was there. I will assume Ms. Guthrie had no idea the news conference that morning was about the Certificate of Live Birth. I will assume she did not know the correct size of the Hawaiian Department of Health’s seal and didn’t think anything of it. The administration used her to verify to the rest of the Press Corps that there was a seal on the form and may have damaged her credibility as a news reporter.

The third major problem is: Was there in fact two different Certificates received from the Hawaii Department of Health? The following information was brought to my attention by another researcher, Robert Moore. He had noticed that both the rubber stamped signature of the State Registrar (see Figure B and Figure 23) and date stamp were in the exact same placement on the Certificate Guthrie saw as well as the Certificate that the reporters and the public saw generated by the PDF on the White House web site later that afternoon. If we take the administrations word that they had two signed and sealed certificates (COLB) then it is impossible to have both certificates

have two applied rubber stamps on it in the exact same position and location. In fact Robert Moore had made a transparency of the web site PDF and overlaid it over the Savannah Guthrie photo and they matched perfectly. I had checked his work by measuring it using the ruler feature in Photoshop and found that they were exact. This is impossible with hand stamped forms.

Figure A: Savannah Guthrie's picture of the COLB, Copy A.

The Forth item is very strange and it involves the “A” in the Registrar’s signature on both forms. The Guthrie Form (see Figure B) shows no added character under the Capital A in Alvin but the other Certificate form the Press Corps and the public PDF has a mysterious italic “E” under the capital “A”. It means either we have two documents both with problems #2 and 3. Or we have really one document produced from a common PDF file that they later put the italic “E” under the capital “A” for whatever reason (see Figure 23).

Figure B: Registrars signature on Savannah Guthrie's photo of the Obama COLB.

### Brief History of Document Archiving and Document Imaging

Before document imaging came into being in the late 1980s, documents like these were archived and stored in post-bound books (post binders). During the April 27, 2011 8:48 am press conference, just before the President spoke, White House Counsel Robert Bauer reaffirmed that by stating: “It is in a bound volume in the records at the state Department of Health in Hawaii.”

Many times they would be microfilmed flat (not in a binder) and stored on reels or microfiche besides the originals. Figure 2 shows an example of a microfilmed Certificate of Live Birth for a person born one day after (August 5) Barack Obama in the same Kapiolani Maternity &

Gynecological Hospital. Since we have an example of a microfilmed Long Form then it is safe to say that all Certificates in that period were microfilmed and still available for inspection as well as the original paper copy. Also these Certificates were embossed with the County's department seal (see Figure 21) as well as signed.

The Federal Government, to standardize law and security features, prevent fraud and detect terrorists, Passed The Federal Minimum Standards for Birth Certificates in 2004; Title 7, Sec. 7211(a)-(d), (See Appendix C for the entire law citation) Which states:

“(b) Standards for Acceptance by Federal Agencies. -

“(1) In general. - Beginning 2 years after the promulgation of minimum standards under paragraph (3), no Federal agency may accept a birth certificate for any official purpose unless the certificate conforms to such standards.

“(2) State certification. -

“(A) In general. - Each State shall certify to the Secretary of Health and Human Services that the State is in compliance with the requirements of this section.

In addition the Federal law clearly states that the Secretary of Health and Human Services may conduct periodic audits of each State's compliance with the requirements of this section. The purpose of the law was to standardize the formats and security features on birth and death records to prevent fraud and detect terrorists. The law also makes it clear that the Federal Government wanted the states to computerize their source documents, which also meant scanning them into a document imaging system. In Appendix C I have highlighted in red, the important sections of the law.

“(D) Audits. - The Secretary of Health and Human Services may conduct periodic audits of each State's compliance with the requirements of this section.

One of the reasons I mentioned the Federal law is because when President Obama gave his news conference, presenting his alleged Certificate of Live Birth, he stated that they had to get special permission to get a copy of his Certificate. His statement appears to be blatantly wrong because these are public documents and he could have requested a copy himself at any time as well as his Secretary of Health and Human Services could have audited the County's records and gotten a copy any time they wanted.

I do not know when the Hawaii Health Department acquired and implemented a document imaging system but it had to be within two years of the enactment of this law. Let me explain the process whereby the Long Form Certificates would have been scanned in. When a county or city institutes a document imaging system, it would start scanning their documents into the system. If the forms are all just type and lines, it would most likely be scanned in as binary images (black pixel or white pixel). If there are photos or other halftone graphics on the page, it may be scanned in as a grayscale which consists of 256 levels of gray going from 0 for white to 255 for black. If there is color on the documents, they may scan them in as color images, but color images are large and impractical to store significant amount of them on the server. The legitimate forms done by the Hawaii Board of Health were scanned in using both grayscale and binary modes. The reason I know this is because I found both methods used on the forms. You cannot have both on an original scanned image from an original.

I should also mention that most document imaging programs save the images as Group IV TIFFs because they produce the best compressed file size. Later programs will also let you put PDFs and other file formats into the database but they are not created by the scanning program but rather existing PDF files created external to the scanning program.

Some of the information on the Long Form is also put into government databases that are used to produce the short form version of the Certificate of Live Birth.

Document imaging systems use a database engine to store the database fields and file locations. Some of the popular databases used are Oracle or Microsoft's Sequel Server. The database is used by the clerks to perform data searches.

The images would be stored on the server at a specific location and the file name would be a series of number and letters. The image would include the correct file origination date (the system date of the server with time added). All imaging programs will let the clerk export an image out and save it in a different location or give it to someone else. The original would still be in the file server. If the Clerk had permission on the server and/or imaging program they could also delete the original image and replace it with another, but the origination date for the image file on the server would be newer than the original. So if there was a real Obama Certificate of Live Birth on the server and for some reason someone wanted to alter it, the new image file would have a newer system date. If there was never a legitimate Obama Certificate of Live Birth entered into the system, then the fraudulent one would have a much newer origination date. System dates on servers are usually controlled by clocks outside the server and usually online. Usually the only person who has full access to the server is the system administrator in the IT department. No clerk would or should have that kind of access.

There would also be a database record that contains the file name of the image in the server with its correct location. The program would also have an audit trail that records who logged on, the time, what the person added, deleted, entered, searched for and even the IP address of the PC the person logged into. All of these records are public records that any member of the public can request a copy of. That is true here in Washington State but it is more restrictive in Hawaii. If the County Health Department gets a request for a Long Form, the clerk would search for the name in the document imaging program. When the program finds the correct name, the image of the Certificate of Live Birth would appear on the screen, which the clerk would print out on a laser printer on some type of security paper which is green in the case of Obama's Certificate (see Figure 1). That is what we are led to believe from what Obama presented on television to the public on April 27, 2011.

#### **What I Discovered about Obama's Certificate of Live Birth and why it is a Forgery.**

What the Obama administration released is a PDF image that they are trying to pass off as a Certificate Live Birth Long Form printed on green security paper by the County Health Department, but this form is a created forgery. Ironically the country has a lot to thank Mr. Donald Trump and Mr. Jerome Corsi and his new book, Where's the Birth Certificate?, because they made President Obama's birth certificate a public issue which in turn forced the White House to produce this forgery to answer both of them. The Obama Certificate of Live Birth Long Form is a forgery for the following reasons.

**1. Curved and non-curved type.** The image we are looking at was scanned in grayscale and some part in binary which cannot be on the same image. The reason I know this is because of the shadowing along the gutter (left-hand side) is produced by scanning in grayscale. It also means that the county employee, who did the original scanning of all the forms, did not take the individual pages out of the post binders. The result is that all the pages in that book display a parallax distorted image of the lines and type. They curve and drop down to the left. If you look at line 2 (see Figure 3) on the form that says *Sex* you will notice the letters drop down one pixel but the typed word *Male* does not. Also notice the line just below *Male* drops down 3 pixels.

The second incident of this parallax problem is seen in line 6c *Name of Hospital or Institution* (see Figure 4). The word *Name* drops down 2 pixels, but the typed hospital name, *Kapiolani*, does not drop down at all, and again the line just below drops down 2 pixels, but not the name *Kapiolani*.

The conclusion you must come to is that the typed in form was superimposed over an existing original Certificate of Live Birth form. In fact, since I found some of the form headings scanned in as binary and grayscale, the form itself is a composite but the person who created it did not flatten the image of the blank form and save it as one file before they started placing the typewriter text on the composite form. The individual(s) who perpetrated this forgery could not evidently find a blank form in the clerks imaging database, so they were forced to clean up existing forms and overlay the typewriter type we see here. The forger was also looking for certificates with the correct stamped dates and that is why I think they used more than one original form. At first I wondered why the forger didn't just typeset the entire form from scratch and overlay the type and not have to worry about the parallax problem. Then I remembered that in the early 1960s there was no phototypesetting and this form was set in hot metal from a linotype machine. The type design I think is Times Roman but they could never replicate the exact design. They were stuck having to use existing forms that were scanned in using binary and grayscale.

Figure 3. Line 2 of the form. Baseline differences.

Figure 4. Line 6c at 500%. The typewriter name of the hospital does not drop down 2 pixels.

**2. There is a white haloing around all the type on the form.** Figure 5 is an example of this. This effect should not appear on a scanned grayscale image. Figure 6 is a grayscale image scanned in at 240 dpi. You will notice that there is no haloing effect around the type and also the security pattern is seen through the type. Figure 7 is a color image where you can clearly see the security green color through the type and no haloing. Figure 8 shows a Black and White (binary) image of the same type. The important thing to remember is that you cannot have grayscale and binary on the same scan unless the image is a composite. This means that different components of the whole image are made up of smaller parts. Figure 9 is an enlarged version of Figure 6 showing what grayscale letters should look like compared to binary.

The next question would be: What would have caused the haloing effect? We know that all the original Certificates of Live Birth (COLB) were microfilmed because we can see the Nordyke Certificate (see Figure 2) was microfilmed. Then some time after 2004 the paper original copies, in post binder books, were scanned using a commercial document scanner with a flatbed, scanned as grayscale images. The forger was working with two types of images. He/she may have used images printed from the microfilmed copy and then scanned the printout in grayscale. At that point the forger would have to invert the image so as to have a white background, black type. Figure 10 is an example of an inverted image of Figure 2. The result would be like Figure 9 but a whiter background. The image I am working with in Figure 10 is only 94 DPI but the forger was working with much higher resolution ( $\geq 240$  dpi). At that point the forger converted the grayscale to a binary image and placed it onto the background form image. The problem was that there were still image values for the pixels around the placed type so when he/she placed the type image over the background and instructed the program to bring the type “forward” it blanked out the background image, hence the haloing effect around the type.

Figure 5. Obama's form

Figure 6. Grayscale.

Figure 7. Color image.

Figure 8. Binary image.

Figure 9. An enlarged version of Figure 6 showing grayscale type.

Figure 10, Inverted image of Figure 2.

**3. The Obama Certificate is loaded with both binary and grayscale letters** which is just another smoking gun that this form is a forgery. It appears the lines and some of the boxes were scanned using grayscale, but only some of the form headings were grayscale and sometimes it is only some letters. Figure 11 and Figure 4 give one example. You will notice that the *H* and, *al*, in Hospital, *I* in Institution, *If* and again the *h* and *l* in hospital were grayscale images, but the rest of the line is binary. The typewriter line below was scanned in as a binary image. I can also tell you for certainty that the form type was scanned in at a lower resolution ( $\leq 200$  dpi). This is because of the size of the pixels on the letters were such that the openings on the *a* and *s* on the first line are not visible and filled in. This may also further indicate that forger took some of the type images from the microfilmed copies.

Figure 11. showing a mixture of grayscale and binary type on the same line.

Another example is found in form box 1a, his name *BARACK* for some reason the “R” is a grayscale image and the rest is binary (see Figure 13). That means the “R” was originally on the form and the rest was not until it was added.

The question again is: Why did the forger leave some grayscale type images on the form and not just erase the whole form? The answer is that he/she needed the grayscale images to re-establish the baseline of the type for the superimposed binary type. This also told me that the forger was an experienced graphic artist.

Figure 13. Another example of grayscale and binary on the same line.

Figure 14. The last “1” is grayscale, but the rest are binary.

Another example is the Certificate number itself (see Figure 14). The last “1” on the form is a grayscale image but the rest of the numbers are not. It also has a different baseline. This is just another example of a cut and paste job. It also means we do not know what the real Certificate number is if there even is one. There are other form boxes that display the same feature, boxes: 5b, 7e, 11, 13, 16, 18a.

**4. The Sequential Number is a fraud.** I would like you to refer back to Figures 1 and 2. You will notice that Barack Obama was supposed to have been born on Friday at 7:24 p.m. August 4, 1961 and the local registrar supposedly accepted it on Tuesday August 8, 1961 and hand stamped the Certificate number “61 10641.” Then notice that the other Certificate of Susan E. Nordyke was born on Saturday at 2:12 p.m. August 5, 1961 and another registrar date stamped it on August 11, but her Certificate number is “61 10637.” Susan Nordyke was a twin and her sister’s Certificate number is 61 10638. Keep in mind there would be only one Bates stamp machine in the office so the numbers would all be unique. There cannot be any duplicates so every Certificate has a unique serial number. Obama’s Certificate would have most likely been mailed on the following Monday, the 7<sup>th</sup> and received by the Clerk Tuesday the 8<sup>th</sup>. Susan Nordyke and her sister’s Certificates looks like they were mailed sometime earlier that week and not accepted until the 11<sup>th</sup> but Susan has a Certificate four numbers less than Obama’s. It is impossible to have Obama’s Certificate number to be four numbers higher than a Certificate that came in three days later.

As stated in #3 the last “1” on the form is a grayscale image but the rest of the numbers are not (see Figure 14). You will also notice that the baseline of the last “1” is straight and level but the rest of the numbers are slanted. This is again irrefutable proof that the Certificate number is a composite of two numbers and hence a forgery. This forgery comes under a separate offense and carries with it 5-years in prison [see Appendix D: Title 19, Ch.47, Sec. 1028(d)(1)].

The facts I have shown you in #3 and 4 tell me several things about how this forgery was assembled. 1. Some person(s) in the Health Department, who had access to the document imaging program, searched the database for someone close to the actual birth date of Obama and found someone near the 4<sup>th</sup> of August, if in fact he was born on the 4<sup>th</sup> and we should not assume that at all. Obama may have chosen the 4<sup>th</sup> of August because they had a baby who died close to his date of birth. The clerk may have cross referenced the death database to find someone who had died and had a birth date close to Obama’s. It has been reported that an infant girl named Virginia Sunahara was born on August 4, 1961 at Wahiawa Hospital in Wahiawa, Oahu, HI who died on August 5, 1961 at the Kapiolani Women and Children’s Medical Center, due to complications. This happens to coincide with the date of birth and birthplace of the Nordyke twins. We could make two assumptions here. 1. Wahiawa Hospital customarily would have completed the COLB form and mailed it to the County Health Department; and 2. Kapiolani Medical Center would have filled out the death certificate. The other less likely scenario could be that her medical records were transferred to Kapiolani Hospital and they would produce the birth certificate and later the death certificate which was later included in the group of birth certificates that contained the Nordyke twins.

The Federal Government wanted the States to cross reference the birth and death databases so the database would have that information. The date stamps have two different colors and sizes (see #5 below) which indicates that both dates came from different Certificates. We can conclude from this that more than one person was involved in the Hawaii Department of Health in assembling the different components that were used: 1. Someone to conduct the database searches to find the right Certificates to create the fraudulent Certificate of Live Birth; and 2. Someone who signed or stamped the fraudulent certificate. I believe that after all the components were assembled they were then given to a graphic artist to actually assemble the whole thing and create the finished forgery. That graphic artist could be located anywhere. In short this was a multi-state conspiracy to defraud the United States.

**5. Two different colors in Form box 22 and 20 Date Accepted by Reg. General.** What is very revealing about this box and date entry is there are two different colors on both lines where there should be no color at all. Both lines were scanned using binary mode, but I see two different colors (see Figure 15). What I think this shows us is that the person who put this fraud together was looking

for a form that had the right date namely “August 8 19 1.” As you can see the only things that are printed in dark green (R=71, G=92, B=73) are “Date A” and “AUG -8 6.” The rest of the type is in black. This tells me that the forger was working in color mode and what they copied from had a color value for some reason unless they put a color value on it.

Figure 15. Two different colors, dark green and black.

The same thing is found in form box 20 “Date Accepted by Local Reg.” Figure 16 again shows that the date has two different colors. The “AUG -8 196” is in dark green (R=87, G=111, B=87) and the “1” is in black. Yet again another irrefutable proof this form is a forgery. Form box 17a displays the same two color image in the word “None”. The “Non” is in dark green.

Figure 16. Another example of two colors on the same line.

**6. The official seal is not part of the Certificate of Live Birth and they used the wrong size impression of a seal.** The Hawaiian law (Section 11-1-2 Seal of the Department of Health) states:

- a) The official seal of the department of health shall be circular in shape, **two and one-fourth inches in diameter**. At the curve on the top portion there shall be the words “DEPARTMENT OF HEALTH” and at the curve on the bottom portion there shall be the words “STATE OF HAWAII.” At the curve on each side portion shall be a star. In the center of the seal shall be the Caduceus, a winged rod entwined with two serpents, which has long been recognized as a universal symbol of medicine. The Caduceus shall be encircled by an indentation, which shall separate it from the words “DEPARTMENT OF HEALTH” and “STATE OF HAWAII .”

Figure 17, Seal on Obamas Short Form

Figure 18: Nordyke seal from 1966  
(Figure 19 is courtesy of Kevin Powell; [www.pixelpatriot.blogspot.com/](http://www.pixelpatriot.blogspot.com/))

Figure 19: Obama's COLB long form Apr. 2011

The first Certification of Live Birth Obama the candidate produced in June of 2008 was the “Short Form” of the COLB. It had the Department of Health’s seal embossed on it (see Figure 17) appearing on it about 1.8” from the bottom of the 11 inch paper. That told me the Health Department is using an electric embosser, which applies ample pressure to leave a clear visible embossment.

Hand seal embossers have only 7/8" or less from the edge of the paper for a 1 3/4" seal. The Health Department seal does not appear obvious on the Obama COLB. A good embossment will distort the type and lines on a form and is clearly visible (see Figure 21). Even on the Nordyke Certificate (see Figure 18) in spite of it being an inverted image from a microfilmed image, it is clearly seen. Figure 19 shows Obama's seal on the COLB presented on April 27, 2011, and is visible only because a color filter was used to see it, otherwise it completely disappears in the design of the security paper (see Figure 20).

Figure 20: Seal on Obama's COLB From April 27, 2011.

Figure 21: Hand stamped seal from an original COLB from 1962.

The official seal on the Obama COLB is a second or even third generation image from another form. The seal embossing did not distort the lines or type on the form and it most likely was never part of his Certificate. We cannot make out any of the type on the seal as well as the two stars and the Caduceus. The distorted background image of a seal can be created using Photoshop or Illustrator by applying it as a watermark. Yet another indication this Certificate of Live Birth is an obvious forgery.

If that wasn't enough I then investigated the size of the latent seal image on the Obama certificate and found it to measure only about 1 3/4" in diameter. The procedure I used to discover the seal measurements were as follows: With the Savannah Guthrie photo (see Figure A) of the document I was able to see the left and right hand sides of the document and knew that was 8 1/2" wide. I was then able to determine the scale of all the components on the form. I then measured the line length on the second line from the bottom. Box 20, 21 and 22 rest on. That length is 6.396" long, measured from the first bold vertical line on the left side of the form to the end of the line (see Figure 22). I then adjusted all the images I had for Certificates including non-Obama Certificates, which I had. What I found was that the alleged embossed seal on the Obama COLB were all 1 3/4" in diameter and that is not the legal seal as described by Hawaii state law, which should be 2 1/4". The administration has the wrong size seal on their certificate and that seal was supposed to be a first generation full size imprint.

Figure 22. The COLB Obama presented on 4/27/11 from the PDF file on the White House web site. The seal measured only 1-7/8" in diameter.

I then examined Certificates of other individuals that I found on the internet. Figure 23 is of a Certification short form of Patricia Decosta dated 2002 and it is also 1 3/4". As stated in the Hawaii state code, it must be 2.25" in diameter. The current Department of Health seal is not the same one

they had in the 1960s. That one was 2¼” in diameter (see Figure 18) but the current seal is not legal—it’s the wrong size and the type is not legible! You cannot make out any of the words, the stars or the Caduceus. I will be notifying the Department of Health of their gross error in the hope they will fit it with a new legal seal. Some time after 1966 the original legal seal was “lost” or stolen because they do not wear out. Some bureaucrat ordered a replacement and was either ignorant of the law or too stupid to ask if there was a specific requirement for the seal. What mystifies me is that the Director of the Department of Health and the registrars did not spot the error and fix it. My conclusion is they just didn’t care about the law.

Figure 23. The Certification of Patricia Decosta dated 2002.

#### **7. The hand stamped certification from the current registrar is a forged stamped notice.**

The Department of Health has the right to produce a legal copy of the original Certificate of Live Birth for people who have the appropriate right to receive one. The Clerk in the office would search the document imaging database and retrieve the correct Certificate. The Clerk would then print out the tiff image on the green security paper. They would then take a rubber stamp that states the following: I CERTIFY THIS IS A TRUE COPY OR ABSTRACT OF THE RECORD ON FILE IN THE HAWAII STATE DEPARTMENT OF HEALTH. Then below this notice would be the likeness of the State Registrar’s signature, in this case it was Alvin T. Onaka, Ph.D. Then the clerk would stamp the date to the left of the certification. See Figure 24 for a Certificate done one month before the Obama’s April 25, 2011 Certificate. Please note that since it is a hand stamp the certificate stamp is skewed up on the right side.

Figure 24. Registrar stamp on a person's Certificate done March 2011.

Now let us look at Obama’s Certificate (see Figure 25) supposedly done on April 25, 2011. Notice the registrar’s rubber stamp has an error on the word “the” which reads “TXE,” but this error does not show up on the same rubber stamp used one month before. In Figure 26 you will see an enlargement of the word. You will notice that the “X” had been created by the graphic artist by filling in pixels so it appears like an “X” but it really is not. Also notice that the whole stamp is too straight on the form. The red lines drawn under two of the lines of type are aligned with the pixels. The stamp rises only two pixels over 3”. My conclusion is that the whole stamp was placed there by the graphic artist to look as straight as possible. The only problem is that no hand stamped notice like this would be placed that perfect on the page.

Figure 25. Obama's Registrar stamp with the errors on it,

Figure 26. Enlargement of the "TXE."

Other investigators have mentioned what looks like an italic "E" under the capital "A" in Alvin. In Figure 24 the same artifact does not appear. This artifact also does not show up on the Savannah Guthrie photo but does appear on all the other copies and PDFs the White House displayed. We have to assume either the artifact was already on the security image the forger used, and forgot to erase it, or it was placed there deliberately for some reason that we don't know yet.

**8. Forged signatures of the Mother and Registrar.** Forgery of a signature occurs in three ways. The old methods were someone would practice signing another's signature until they got good at it. Another was to simply trace the signature from a previously known signature. The new way is to find a signature and scan it into a computer. Then place that signature, or parts of a signature, onto the desired form or check. The signature of the mother, *Ann Dunham Obama* in Box 18a is made up of two images. The "Ann D" is in grayscale and the rest of her name is a binary image. The signature of the registrar *U"K"L Lee* is also made up of the same image types. The "K" really looks like "IL" and the *I* is a binary image and the rest of his name is grayscale. That means the *I* was added in another layer. Both errors can be seen included in Figure 27. Irrefutable proof the Obama Certificate is a forgery.

**9. Multiple layers in the PDF file from the White House.** I am not the first one to find this fact and they deserve the credit for discovering it. What they discovered is that when you open up the PDF file in Adobe Illustrator and you turn on layers, you see a long list of nine different layers that correspond to different sections of the form, including the signatures on the form. Figure 27 shows the layer that contains most of the typewriter and form text.

I discovered using just my Adobe Acrobat 8 Standard that I could also see the different components disappear when I enlarged the image to just 400% and used the "hand" tool to quickly move around the image. When I moved the image fast, the various type components would disappear from the form but the lines stayed just as I had concluded.

I also opened up the White House PDF file in WordPad so I could see the codes and headers in the file. There I discovered the evidence for the nine layers embedded in the code (see below). The big surprise I discovered was that the file was finished or created on April 27, 2011 at 12:09 pm and the copy I had downloaded from the White House web site was modified on April 28, 2011 at 9:58 am, the day after the news conference. The whole White House story that the President had his Seattle-based lawyer fly to Hawaii and pick up two signed and stamped paper Certificates of Live Birth and fly directly to Washington DC, is obviously not the document the public has been shown. In other words the whole story may not be true. I checked the cost for UPS to ship the documents next day and delivery by 8:30 am Tuesday and it was only \$84.00. I checked the cost for a lawyer to fly

last minute from Seattle to Hawaii then to Washington DC it is thousands of dollars. Their story is just not believable.

The PDF file indicates the PDF “CreatorTool” was *Preview* which is an Apple product that is just like Adobe’s Acrobat Standard, which is a viewer and print driver. It is not a photo and image design program. It is just the program that created the PDF file (as a print driver). The Preview program can also read twenty-six different image and document types, that includes Adobe Illustrator and Photoshop.

Defenders of the Administration’s argument that the layers were created by an OCR program (Optical Character Recognition) are also ridiculously wrong because the PDF file is not a searchable PDF therefore no OCR process was performed and additionally no text object was found within the PDF file I examined.

Some of the examples of the layering can be found on the following YouTube web sites.

This one shows the layering in Illustrator:

<http://www.youtube.com/watch?v=wQAqvtXenKg&feature=related>

This one shows that letter “B” in box 1e and 8 are exactly the same, another example of cut and paste.

[http://www.youtube.com/watch?v=aMLdrrC1-xs&feature=mfu\\_in\\_order&list=UL](http://www.youtube.com/watch?v=aMLdrrC1-xs&feature=mfu_in_order&list=UL)

Another good explanation of layering showing at least 9 layers.

<http://www.youtube.com/watch?v=QNJfdKClbH4&feature=related>

The discovery of nine layers in the PDF image didn’t matter for my analysis 1 through 7 because I was able to export the image as a TIFF (18.35 MB) out of that PDF using my Adobe Standard software. So I was working from a flattened image and was able to find all that I did, in other words the layers were irrelevant to me but was just further proof that the Obama’s Certificate of Live Birth is a forgery.

STATE OF HAWAII  
**CERTIFICATE OF LIVE BIRTH**  
 DEPARTMENT OF HEALTH  
 FILE NUMBER **151**  
**61. 1064**

1a. Child's First Name (Type or print) **BARACK** 1b. Middle Name **HUSSEIN** 1c. Last Name **OBAMA, II**

2. Sex **Male** 3. This Birth **1st** 4. If Twin or Triplet, Was Child Born **1st** 5a. Birth Date **August 4 1961** 5b. Hour **7:24 P.**

6a. Island **Oahu** 6b. Is Place of Birth Inside City or Town Limits? **Yes** 6c. County **Honolulu, Hawaii**

7a. Usual Residence of Mother: City, Town or Rural Location **Honolulu** 7b. Island **Oahu** 7c. County **Honolulu, Hawaii**

7d. Street Address **6085 Kalanianaʻole Highway** 7e. Is Residence Inside City or Town Limits? **Yes** 7f. Is Residence on a Farm or Plantation? **No**

8. Full Name of Father **BARACK HUSSEIN OBAMA** 9. Race of Father **African**

10. Age of Father **25** 11. Birthplace (land, state or foreign country) **Kenya, East Africa** 12a. Usual Occupation **Student** 12b. Kind of Business or Industry **University**

13. Full Maiden Name of Mother **TANLEY ANN DUNHAM** 14. Race of Mother **Caucasian**

15. Age of Mother **18** 16. Birthplace (land, state or foreign country) **Wichita Kansas** 17a. Type of Occupation Outside Home During Pregnancy **Student** 17b. Date Last Worked **8-7-61**

I certify that the above stated information is true and correct to the best of my knowledge. 18a. Signature **Barack Obama** 18b. Date of Signature **8-7-61**

I hereby certify that this child was born alive on the date and hour stated above. 19a. Signature **Barack Obama** 19b. Date of Signature **8-8-61**

23. Evidence for Delayed Filing or Alteration

Figure 27: The layer that contains most of the forms text and typewriter text.

I have received other White House PDF files from Graphic artists around the country. As a result I received a PDF Certificate that was put up on the White House web site no more than 10 minutes after it was uploaded. That PDF showed nine layers, no OCR (see Figure 28), Image file created at 7:50 am on the 27<sup>th</sup> (see Figure 29) and finally the PDF file created using *Preview* (the print driver) and modified on 4/27/11 at 12:09 p.m., which is similar to my file. My conclusion is that this shows the individuals in the White House were “fixing” or changing this forgery as late as 7:50 a.m., an hour before the pre-news conference.

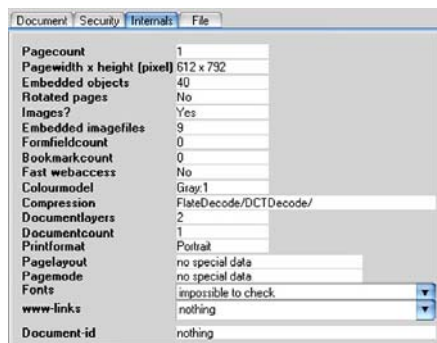

Figure 28. Shows 9 layers and no OCR.

Figure 29. Created 7:50 AM

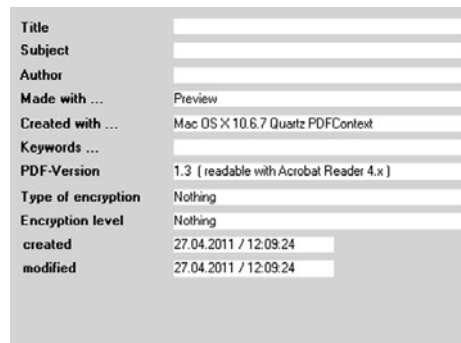

Figure 30. PDF modified 4/27/11 @ 12:09 am.

## A Rebuttal to the Discovery of the Multi Layers Found in the PDF File.

To begin with the White House PDF was not a searchable PDF therefore no OCR process was performed on the image and therefore the following rebuttal and defense of Obama's COLB is irrelevant and a very poor attempt at defending this blatant forgery.

The only rebuttal to the nine layers discovered in the PDF file released by the White House was a statement from Canadian graphic artists from Quebec by the name of Jean-Claude Tremblay on April 29. It was reported by Fox News and on their web site at:

<http://www.foxnews.com/politics/2011/04/29/expert-says-obamas-birth-certificate-legit/>.

He tries to excuse the multi-layers as merely an artifact of an OCR (Optical Character Recognition) engine and then saved as a PDF. There are three major reasons he is wrong and I know

from his statement he knows nothing about OCR engines and how they work and their file structure. First the PDF file is not a searchable PDF and no text object could be found in the PDF file. Second, the Obama PDF certificate was supposed to have come directly from the Health Departments office. As stated before, the records they have would have absolutely no reason to be OCR'd and if they were asked to give the customer a PDF image it would be from their existing TIFF image stored in their document imaging program on the server. The program would have done no OCR processing at that time.

The third reason is the lack of OCR files in the PDF file. My qualifications on OCR programs are considerable. Our own document imaging program, TheRepository, has an OCR option from Expervision that is called TypeReader. We integrated TypeReader into our program but to do this we had to sign a non-disclosure statement with them and then we got their Took Kit and API. When an OCR program saves a file as a searchable PDF, the file contains three main files within it. The first file is an image file, usually a compressed Group4 TIFF. The second file is an ASCII text file and the last file is a matrix file that contains the X and Y coordinates of all the words in the document. The starting point for the image file and the matrix file is usually the upper left hand corner of the image measured in pixels. The text file and matrix files would never be seen as separate layers and there are certainly not nine layers. The three files would be in a PDF "wrapper" and that is all. All OCR programs work on the same principle.

## Conclusion

This forgery is so outrageous and obvious a fraud that it brings to mind what the forger had in mind. You could truly call this a Frankenstein Certificate of Live Birth. I will not try to speculate about the psychology of the forger and stick to the facts I know or can logically conclude. It will be for Congressional hearings, for the FBI to investigate and finally federal and state courts to decide that. It had been reported by the *Washington Times* that the White House changed the image of the PDF the next day and that is correct since the PDF file proved it was altered on the 28<sup>th</sup> at 9:58 a.m.. I would conclude from that action that the White House knew they had a problem with the Long Form Certificate. It was certainly convenient for Osama Bin Laden to have been found and killed within a few days of the release of this fraud.

The disturbing part of this forgery is that we the citizens do not know who our President is and if he is even a citizen. It is a logical conclusion that since President Barack Obama felt it necessary to have a Certificate of Live Birth forged for himself then we must conclude that there is in fact no birth certificate in Hawaii and therefore he was not born inside the United States, as the Constitution requires (see Appendix A); and further, that he knew it and others also knew it but wanted him in office for whatever reason. The answer to that question might be found in a report funded by the Pentagon in 2009 entitled *Economic Warfare: Risks and Responses. Analysis of the 21st Century Risks in Light of the Recent Market Collapse.* This can be downloaded from:

[http://www.archiveindex.com/Obamas\\_Certificate\\_Forgery.html](http://www.archiveindex.com/Obamas_Certificate_Forgery.html).

The report was in response to the economic collapse in early 2008 and the rise in oil prices to over \$140 per barrel. You will note that George Soros is prominently mentioned and he was, and still is, a major supporter of Obama. Also remember that Soros has made his money destroying foreign currencies just as what is happening to the U.S. dollar now.

Mr. Tim Adams a former senior elections clerk in the County of Honolulu reported on WorldNet Daily, "There is no birth certificate," and "I had direct access to the Social Security database, the national crime computer, state driver's license information, international passport information, basically just about anything you can imagine to get someone's identity," Adams explained. "I could look up what bank your home mortgage was in. I was informed by my boss that we did not have a birth record [for Obama]." He also stated that they checked both hospitals there, Queen's Medical

Center in Honolulu, as well as the Kapiolani Medical Center for Women and Children. "They told us, 'We don't have a birth certificate for him,'" he said. "They told my supervisor, either by phone or by e-mail, neither one has a document that a doctor signed off on saying they were present at this man's birth."

WorldNetDaily reported that they confirmed with Hawaiian officials that Adams was indeed working in their election offices during the last presidential election. "His title was senior elections clerk in 2008," said Glen Takahashi, elections administrator for the [city and county of Honolulu](#). Takahashi also confirmed Adams' time frame at the office from spring until the month of August.

Reference: [ <http://www.wnd.com/?pageId=165041#ixzz1KjG5TV6r> ]

A second article published in WorldNetDaily on January 24, 2011 also states: "Senior officers in the City and County of Honolulu Elections Division told me on multiple occasions that no Hawaii long-form, hospital-generated birth certificate existed for Senator Obama in the Hawaii Department of Health," Adams' affidavit reads, "and there was no record that any such document had ever been on file in the Hawaii Department of Health or any other branch or department of the Hawaii government." "My supervisor came and told me, 'Of course, there's no birth certificate. What? You stupid,'" Adams said. "She usually spoke well, but in saying this she reverted to a Hawaiian dialect. I really didn't know how to respond to that. She said it and just walked off. She was quite a powerful lady."

Mr. Tim Adams also signed a notarized affidavit (see Figure 26) "swearing he was told by his supervisors in Hawaii that no long-form, hospital-generated birth certificate existed for Barack Obama Jr. in Hawaii and that neither Queens Medical Center nor Kapiolani Medical Center in Honolulu had any record of Obama having been born in their medical facilities."

Figure 26. Mr. Tim Adams affidavit signed 1/20/2011.

In the affidavit Adams swears, "During the course of my employment, I came to understand that for political reasons, various officials in the government of Hawaii, including then-Governor Linda Lingle and various officials of the Hawaii Department of Health, including Dr. Chiyome Fukino, the director of the Hawaii Department of Health, were making representations that Senator Obama was born in Hawaii, even though no government official in Hawaii could find a long-form birth certificate for Senator Obama that had been issued by a Hawaii hospital at the time of his birth."

Reference: [ <http://www.wnd.com/index.php?fa=PAGE.view&pageId=254401> ]

The reason I have included Mr. Tim Adams testimony is because it strongly suggests that there was and is an ongoing conspiracy to defraud the United States (Title 18, pt.1, Ch 47, sec. 1028(a)(4) using a fraudulent document. The shameful thing is that it's the one document that is required for a

person to become President of the United States and these “public” officials had chosen to deceive for political and possibly financial gain. The individual holding the office of the President of the United States has access to all the nation’s secrets and is Commander and Chief of the armed forces. **This fraudulent Certificate of Live Birth is a national security issue.** These are very serious charges connected to what the conspirators have done. I have included the section of Title 18 that pertains to this forgery for you to read in full. It comes directly from the Federal government web site <http://uscode.house.gov/> so it is current.

#### **Rebuttal to the Hawaiian Published Newspaper Notice of Obama Jr. Birth.**

WorldNetDaily reported on January 7, 2010 that in 1961, Hawaiian law specifically allowed “an adult or the legal parents of a minor child” to apply to the health department and, upon unspecified proof, be given a birth document in the form of a Certification of Live Birth. The only requirement stated in Hawaiian law is “that the legal parents of such individual while living without the Territory or State of Hawaii had declared the Territory or State of Hawaii as their legal residence for at least one year immediately preceding the birth or adoption of such child.” So, even the listing of an address on a COLB or in a newspaper birth announcement is no proof the baby was born in Hawaii. Under Hawaiian law, a family wishing to register the birth of a baby born outside Hawaii can list a family residence in Hawaii as the birth address, even if the mother was residing outside Hawaii at the time the baby was born. [<http://www.wnd.com/index.php?fa=PAGE.view&pageId=121136> ].

The only way we would know if Barack Obama Jr. was born in Hawaii is if his mother’s passport records could be retrieved and find out when she re-entered the United States. It is apparent that President Obama has presented no evidence that he is a “Natural Born Citizen” and there is a good chance that he may not even be a citizen.

#### **The Laws that Have Been Broken**

I am not an attorney but was an accountant and worked for three CPA firms before I went into business for myself. I have read and understood the Federal Tax code, so understanding Title 18 is no problem. I have listed in Appendix D the entire section of the Federal Code that directly covers the seriousness of this fraud.

Under Hawaii State code §708-851, it would be forgery in the first degree which is a Class B Felony (see Appendix B).

The Federal charges are much more extensive because of the nature of the crime, and who did it and the ramifications to the country. It would not surprise me that maximum prison sentences were given out but of course a judge and jury would have to determine that. The Federal law is covered under **Title 18-Crimes and Criminal Procedures; Part 1-Crimes, Chapter 47- Fraud and False Statements, Section-1028-Fraud and related activity in connection with identification documents, authentication features, and information** is the main section that the forgery of a Certificate of Live Birth would be covered under. 1. Forgery of a public document; 2. Conspiracy to commit forgery, because Obama had to have paid someone to create the forgery and it is evident others were involved; 3. Obstruction of Justice if this went to trial; 4 and 5. If the conspirators had bribed a County Clerk(s) to insert this PDF file into the county’s document imaging system, you would have bribery and tampering with government records. All of these are felonies and are impeachable offenses. The penalty for committing document forgery is up to 15 years in prison and for just forging the unique Certificate number is another 5 years. At this point it doesn’t matter if he was born in Kenya or Hawaii. He and his fellow conspirators are facing forgery charges and much more.

If Congress does not hold a hearing on this forgery, the vast majority of Americans will lose faith in our country’s legal system and governmental institutions. As it is, the public poll numbers for

Congress are in the low two digits. Congress and the ruling elite have to decide whether we are a country of laws or are the laws only enforced on the little people and those outside of the ruling political party.

You do not have to use my name when presenting this information because I am not looking for publicity, but you can freely use the information to inform the public. I am willing to give expert testimony in court or in a Congressional hearing, if requested.

My signed notarized affidavit is available for downloading at:  
[http://www.archiveindex.com/Obamas\\_Certificate\\_Forgery.html](http://www.archiveindex.com/Obamas_Certificate_Forgery.html)

Very truly yours  
Douglas Vogt  
President of Archive Index Systems, Inc.  
A disappointed Natural Born U.S. Citizen.

## Appendix A

### ***Qualifications to become President:***

**Constitution of the United States: Article. 2 Sec. 1(5):** No Person except a *natural born Citizen*, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the **Age of thirty-five Years**, and been fourteen Years a Resident within the United States.

## Appendix B

### ***Hawaii State Law:***

**§708-851 Forgery in the first degree. (1) A person commits the offense of forgery in the first degree if, with intent to defraud, the person falsely makes, completes, endorses, or alters a written instrument**, or utters a forged instrument, or fraudulently encodes the magnetic ink character recognition numbers, which is or purports to be, or which is calculated to become or to represent if completed:

(a) Part of an issue of stamps, securities, or other valuable **instruments issued by a government or governmental agency**; or

(b) Part of an issue of stock, bonds, or other instruments representing interests in or claims against a corporate or other organization or its property.

(2) **Forgery in the first degree is a class B felony.** [L 1972, c 9, pt of §1; am L 1988, c 155, §2; gen ch. 1992; am L 1997, c 243, §2]

**§338-6 Local agent to prepare birth certificate.** (a) If neither parent of the newborn child whose birth is unattended as provided in section 338-5 is able to prepare a birth certificate, the local agent of the department of health shall secure the necessary information from any person having knowledge of the birth and prepare and file the certificate.

(b) The department shall prescribe the time within which a supplementary report furnishing information omitted on the original certificate may be returned for the purpose of completing the certificate. Certificates of birth completed by a supplementary report shall not be considered as "delayed" or "altered". [L 1949, c 327, §10; RL 1955, §57-9; am L Sp 1959 2d, c 1, §19]

# The American Typewriter

How a Young Computer Graphics Person Could Not Understand How to Use a Computer to Forge a Typewritten Document.

It's been some 30 years since we have used typewriters to produce documents. Computers have replaced the typewriter and given us great advantages in document preparation. There is no need to understand the old typewriter. Except when you need to forge a typewritten document.

A computer in the hands of a young person who can create a modern forgery is no match for the old style quirky mechanical typewriter. The forger who produced the Obama Hawaiian Long Form Health Department Birth Certificate may have thought that all typewriter typeface styles were alike. To get his letters he should have assumed that he needed only to match typewritten letters found in the old files of Hawaii birth certificates to scan ... copy and paste into his new document. Those old files should be all alike having been used to produce birth certificates in the 1961 era.

He must have understood that he needed to copy the old typewriter styles and would find them in the files.

But understanding scanners ... he also had to know that scanning a letter "t" one time and using it all over his document would be conviction assured. Because scan lines engage a letter differently every time it's done. So he scanned a bunch of old birth certificates and used a different "t" each time.

The mistake was that many of the letters in the old files were from different typewriter styles and that's something he did not realize ... resulting in many typewritten letters on his forgery that did not match each other.

I hope this helps to explain what might have happened with this document.

Paul Irey

Every typewriter typed character is assigned a number in the order it is found in the document.

# EVIDENCE OF FORGERY

The two capital letters “A”s are from the word “**BARACK**” on the birth certificate found at section 8 of the form. There is only one letter between them. Why then is #144 significantly bigger than #146 if the same type-writer key struck both?

From Section 8

AA BARACK

143 144 145 146 147 148

144 146

Notice the other differences seen in the same word from different locations on the birth certificate. All the letters look different. Why?

The two capital letters “R” are from the same word “**BARACK**” as above and the other word “**BARACK**” in section 1 of the form. Why then is #3 significantly shorter and wider than #145 if the same typewriter key struck both? Note also the enclosed area in #145 is smaller than the enclosed area in #3 even though #145 is taller.

From Section 1

RR BARACK

3 145

1 2 3 4 5 6

The two lower case letters “s” from the word “**Hospital**” in section 6c and “**University**” in section 12b are shown to be different because of the width of the letters. The lower case “s” #88 is wider than the lower case “s” in #198 as shown with the green and purple color bars shown under the letters.

From Section 6c

SS Hospit

86 87 88 89 90 91

88 198

From Section 12b

ersity

196 197 198 199 200 201

The two numbers “2” are from “7:24” in section 5b and section 10 of the form. Why then is #40 significantly wider than #168? Notice also the difference in height of #168. Can you imagine how these two typewritten letters were typed with the same typewriter?

From Section 5b

22 7:24

39 40 41

From Section 10

25

168 169

40 168

The two lower case letters “a” from the word “Male” found in section 2 and the word “Kapiolani” found in section 6c. Notice that the first “a” #23 is not as wide as #56. Also note the differences of the shape of the enclosed areas and the serifs at the top left of both.

From Section 2

Male

22 23 24 25

From Section 6c

Kapio

55 56 57 58 59

The two lower case letters “i” from the word “University” in section 12b and “Kapiolani” in section 6c are shown to be different because of the dots over the letters. The dot in #199 is higher than that of #58 and shows more space over the letter. Also note the color bars indicating the difference in width between the letters.

From Section 12b

ersity

196 197 198 199 200 201

From Section 6c

piola

57 58 59 60 61

The two capital letters “S” are from “HUSSEIN” in section 8 and “STANLEY” in section 13 of the form. Why then is #151 significantly more narrow than #201? Notice also the serif differences indicated with the arrows showing that the serif on #151 is placed further back to the left on the “S” than as shown on #201.

From Section 8

HUSSEI

149 150 151 152 153 154

From Section 13

STANLE

201 202 203 204 205 206

The two lower case “n” letters are different in size. #62 found in section 6c is much shorter than #193 found in section 12b. This is a good place to insert a photo of a typewriter key to remind us that the impression is struck by an engraved letter that is steel and incapable of changing size.

Close up of a Typewriter Key flopped for clarity

62 193

From Section 6c

iolani

58 59 60 61 62 63

From Section 12b

Univer

192 193 194 195 196 197

The two lower case letters “e”  
#25 from the word “Male” found  
in section 2 and the word  
“Maternity” found in section  
6c show us that #25 is from a  
different design of type style  
with a tilting horizontal bar  
and #25 is also bigger in size.

The two lower case letters “u”  
from the word “Honolulu”  
#101 from section 6a and  
“Oahu” #105 from section 6b  
are shown to be different in  
width as indicated with the  
color bars above the letters.  
Also note the different design  
of the bottom part of the letters.

The two numbers “1” from the  
date “1961” #35 from section 5a  
and “18 Wichita” #225 from  
section 15 are shown to be different  
in width as indicated with the  
color bars below the letters.  
Also note the different design  
of the bottom part of the letters.

The Word “Student” found in section 12a of the birth  
certificate was the first problem I noticed because it  
was one word with two variations of the letter “t” and  
was clearly a different drawing of the letter mainly  
displaying a different  
extension at the bottoms  
of those letters. As a  
typographer I could  
see no reason for a

different style of letter within the same word. Other  
examples on the page seem to suggest that perhaps  
the form was transferred to different departments  
to fill out different sections ... but that could not  
happen with one word. Later study showed that

too many of the letters on  
the birth cert. did not  
match each other ...  
even for many typist.

**If all the letters are from the same  
typewriter ... why don't  
they match? It appears that it  
was put together with letters from  
different sources  
and this means it's a forgery!**

\* \* \* \*
